

powerhive

KEEPING IT SAFE

PowerHive is a soundproofed 'micro data centre in a box' which allows for IT deployment wherever and whenever it is needed, saving space, cost and deployment time.

IT spaces in small-medium sized businesses and large multi-site rollouts are often left unmonitored, unorganized and space constrained. Properly deployed physical IT infrastructure is critical as your unsecured company utilizes mobility solutions, virtualizes servers, and adopts cloud applications.

PowerHive will save your company time and energy, cut costs, and make your IT environment more simple, adaptable, and manageable.

REDUCE CO2

SPEED UP
INSTALLATION TIME

**“We’ve saved over
€19,500 a year”**

One of Ireland and the UK’s most renowned IT services companies had plans to build a bespoke server room. They budgeted for a dedicated space to be partitioned, secured, soundproofed and air-conditioned. The total project was budgeted in detail and expected to cost up to €22,500 in upfront infrastructure costs alone.

// Thanks to PowerHive, we’ve saved €15,950 in capital expenditure on server room build costs, and have calculated in excess of €19,500 of savings annually: €12,000 in reduced rent due to saved space which we will use for additional telesales operatives, and €7,500 due to reduced

energy costs – which, incidentally, is equivalent to a saving of 27 tonnes of CO2. We were also able to save 15 weeks in installation time, compared to how long it would take to build a server room, so we were operational much quicker. //

SHRINK OFFICE SPACE
REDUCE RENT COSTS
