advisoryservice

HANLEY ENERGY
TRUSTED ENERGY PARTNERS

Eight reasons why Hanley Energy's advisory services can **add value to your business.**

1 Time

If you have a certain time window in which to execute your projects, Hanley Energy provides the capability to accelerate time-to-market or time-to-decision of any given requirement.

2 Focus

Hanley Energy can provide you with the dedicated resources to focus on a critical business task.

3 Methodology

Hanley Energy offers a clear structure via the 'Consulting Service Delivery Framework' (Research, Refine, Report and Recommend, Realise) to deliver a tangible, transparent and modular consulting service.

4 Skills

Hanley Energy can give you access to skills and knowledge to replace or augment a client team delivery.

5 Efficient use of CapEx and OpEx (or CAPEX, OPEX Optimisation)

Hanley Energy can support clients in the reduction or efficient usage of both CAPEX and OPEX for critical infrastructure investments.

6 DevOps

Hanley Energy allows you to harness its expertise in both software development and operations to deliver more effective solutions faster to end-clients

7 Customer Lens

One of the core principals of Hanley Energy Consulting is the ability to assess the multidimensional aspects of critical infrastructure investments (Technical, Operational, Commercial, Financial and Market Opportunity).

8 Vendor agnostic

Hanley Energy offers a vendor-agnostic technical analysis, assisting enterprise functional leaders in the validation of key stages during the business decision-making process to directly support successful outcomes.
