

**Powerlink BCPM50  
architecture advantages**

- Modular and expandable architecture with capability to size the number of current measurements according to the application needs
- Main measurement and branch circuit measurements managed in the same metering solution
- Integrated display for main metering display
- Software and android mobile app tools to configure the installation layout in the easiest and most intuitive way
- Intuitive diagnostics on app & software
- Easy to customise, install, configure and monitor makes the solution suitable for both new and retrofit installations
- Easy swappable branch circuit module in case of servicing or expansion.

*Optional Extras*

- Residual current protection and monitoring
- Standard or customised panel mount kit
- Upgrade to Microsoft Azure Certified IoT platform
- Data backup on external devices via FTP, DP (data push), HTTP, Modbus TCP/IP and SMTP via wired or wireless connection.
