

Powerlink PA15 is a user-friendly and modern power analyser from the **Powerlink** family, built to simplify energy monitoring and power analysis needs for existing and new installations.

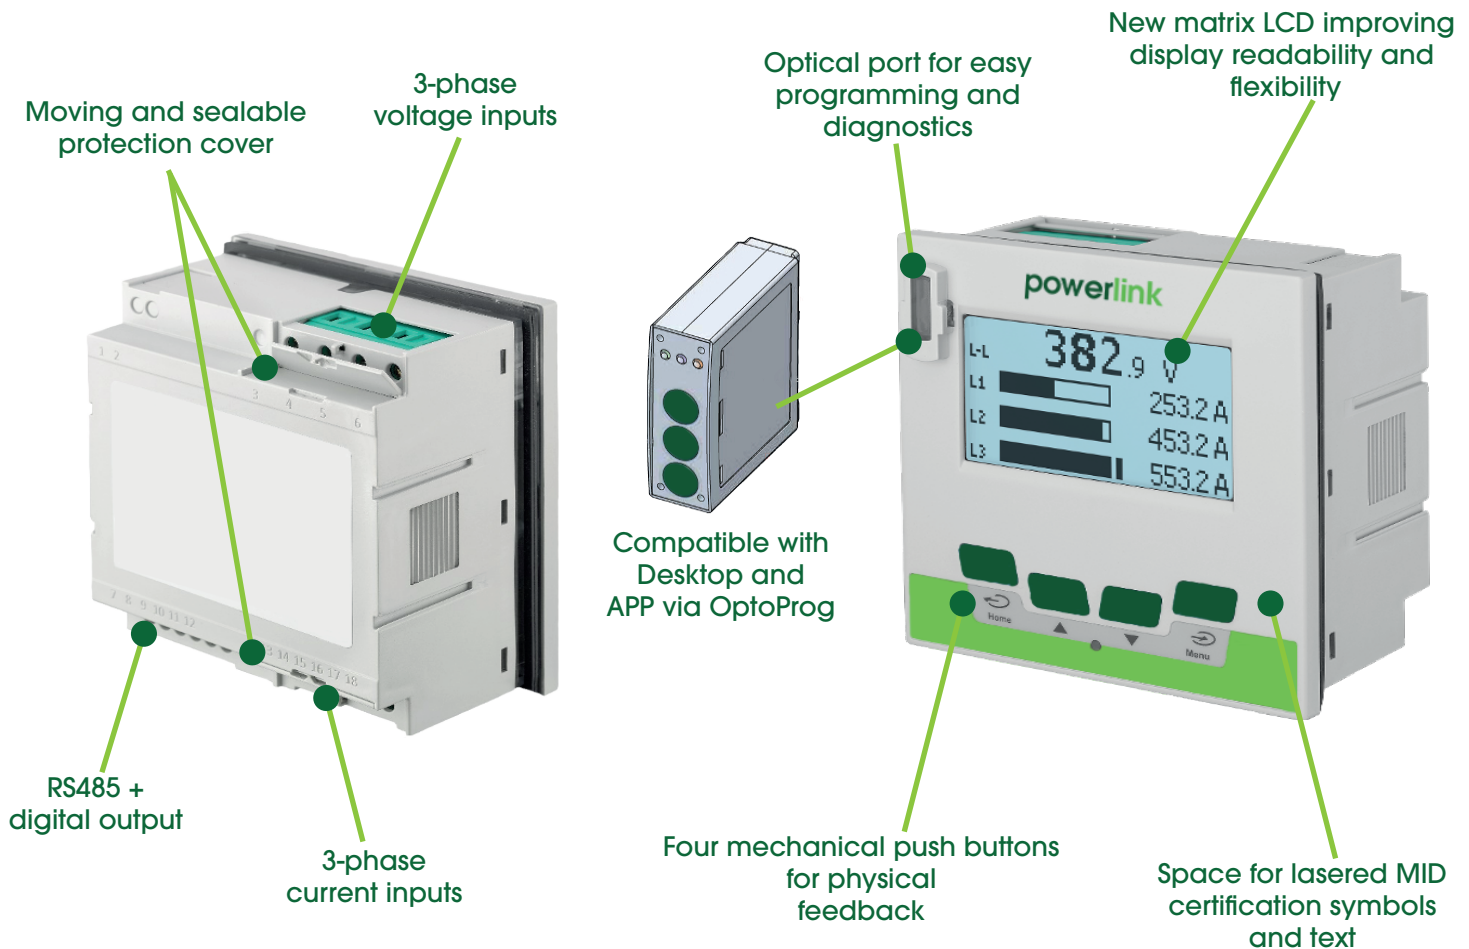

Powerlink PA15

Features:

Intuitive back-lit graphical display	Enhanced readability and user-friendly display with bar-graph visualisation of parameters.
Intuitive mechanical keyboard	Easy navigation for configuration and accessing desired information.
MID Option	Tamper proof provision for fiscal metrology.
Quick Setup	Wiring check on startup. Mobile app with Bluetooth module for quick and error-free commissioning.
Digital Output	For pulse transmission or alarm.
Real-time data capture	Continuous reading of voltage and current.
Data Communication	RS485 Modbus RTU - 100ms data refresh.
Compatible with third party systems	Suitable for 1-phase, 2-phase, 3-phase systems with different voltages and frequencies.
cULus and CE Approved	

Benefits:

Powerlink PA15

- Measurement Range: From 0.25A up to 10,000A using current transformers CTs
- 96x96mm modular metering solution
- Available in self-powered or auxiliary powered options
